The childbirth rite of passage is a time of enormous transformation and growth for women. The beliefs, attitudes and fears of those supporting a woman influence her experience and her sense of self during transformation.

This retreat will be a journey into the roles and responsibilities of those who hold space for births to unfold.

You will participate in a weekend of connection, community, learning and nurturing. You will learn skills, and ways of being that support the physiology of birth and the transformative aspects of the birth experience.

At this retreat you will deeply explore what you bring into your relationships with childbearing women, and how this influences your presence at birth. You will also learn how to be 'with woman' in today's complex birthing climate.
